Foreword **iv**

Workshop Programme **v**

List of Sectionicipants **viii**

T. Altenkirch Proving Strong Normalization of CC by Modifying Realisability Semantics **1**

P. Audebaud CC^+: An extension of the Calculus of Constructions with fixpoints **15**

F. Barbanera and S.Berardi A Symmetric Lambda Calculus for "Classical" Program Extraction **31**

B. Boyer and G. Dowek Towards Checking Proof-Checkers **51**

T. Coquand Infinite Objects in Type Theory **71**

T. Coquand and P. Dybjer Intuitionistic Model Constructions and Normalization Proofs **85**

T. Coquand and J. Smith What is the status of pattern matching in type theory? **111**

G. Dowek, G. Huet and B. Werner On the Definition of the η-long Normal Form in Type Systems of the Cube **115**

H. Geuvers Conservativity between logics and typed λ calculi **131**

S. Hayashi Logic of refinement types **157**

L. Helmink, M. Sellink and F. Vaandrager Proof-Checking a Data Link Protocol **173**

M. Hofmann Elimination of extensionality in Martin-Löf type theory **213**

L. Magnusson Refinement and local undo in the interactive proof editor ALF **227**

S. Maharaj Encoding Z Schemas in Type Theory **245**

M. Miculan The Expressive Power of Structural Operational Semantics with explicit assumptions **253**

B. Nordström The ALF proof editor **285**

C. Parent Developing certified programs in the system Coq, The Program tactic **299**

F. Pfenning Refinement Types for Logical Frameworks **315**

R. Pollack Closure Under Alpha-Conversion **329**

C. Raffalli Machine Deduction **347**

A. Ranta Type theory and the informal language of mathematics **363**

D. Wolfram Semantics for Abstract Clauses **375**
